

Duster Rejuvenator

A unique formula of sprayable highly thick paraffin which Rejuvenates the Duster to attract dust particles from your car's dusty surface.

Durability

Duster rejuvenator – (HSN – 3405 3000)

Packing

500ml

Characteristics

- Sprayable
- Milky white paraffin wax
- Sticks to cotton strands

Key Benefits

- Rejuvenates your Jopasu Car Duster.
- Property of the Car duster of picking up dust is regained.
- One 500 ml bottle can Rejuvenate your Car Duster three times.

How to use

- **Process for washing Jopasu Car Duster**
 - Soak the duster in water 2-5 minutes.
 - Pour shampoo/liquid detergent over it and generate the foam, and keep rubbing the duster by hand with help of little water (if powder detergent. 1 litre - 1 teaspoon). Allow it to react for 10-15 minutes.
 - Repeat the procedure one more time if required.
 - Rinse it with fresh water.
 - Allow the Duster to dry for 5-6 hours.
- **Process of applying Duster Rejuvenator**
 - Check whether the Duster is perfectly dried. Shake the Duster Rejuvenator before use and ensure the sprayer nozzle is in the spray mode and not in stream/off mode.
 - By holding the Duster in one hand, spray Duster Rejuvenator on the Duster at least 50-60 times covering the overall surface.
 - Keep the Duster aside for atleast 30-40 minutes. This step is crucial to allow wax to be soaked on cotton strands. During this time water and solvents evaporate thus making wax absorption successful.
 - Again hold the Duster in one hand, spray Duster Rejuvenator on the Duster at least 50-60 times covering the overall surface. Keep the duster aside for atleast 30-40 minutes.
 - One more time hold the Duster in one hand, spray Duster Rejuvenator on the Duster at least 50-60 times covering the overall surface. Keep the duster aside for atleast 30-40 minutes and allow the duster to dry well.
 - Note that spraying and keeping aside is done three times. Spraying overall for 150-180 times.

Notes

- One click spray can spray 0.90 ml of wax emulsion. So 180 sprays will consume almost 162-165 ml of the bottle. Hence this 500 ml bottle can Rejuvenate the Duster three times.
- Do not freeze. Do not expose to sunlight and high temperature (> 50).
- Do not dry the Duster in Sunlight.
- Do not use the Duster for that day.
- Always keep the bottle sealed with the nozzle.
- Shelf Life for this product is 24 months.
